I've double checked that I have the bgl file (C:\Users\Darren\Desktop\SysRecovery-Server\Apex_RECOVERY.bgl) Technical Field The present disclosure relates to a handover technology of an access network. Description of the Related Art In the field of mobile communication, the handover is a function for transferring a communication session of a user from one access network to another access network. The handover is performed when the user moves from one cell covered by a base station of the current access network to another cell covered by the base station of the another access network. In the related art, the handover is implemented by combining techniques such as beam forming, path switching, and cell selection. The beam forming is a technique in which a pilot signal and a data signal are mixed in the same carrier so that a desired beam is formed in a desired direction. The path switching is a technique for switching a data path from a current access network to another access network in order to receive a traffic signal and to transmit a traffic signal in the current access network. The cell selection is a technique for selecting a cell having a smallest reception power among cells covered by a plurality of base stations. In the case of performing the
